

# CASEBOUND BOOK COVERS

## PREPARING YOUR ARTWORK FOR CASEBINDING

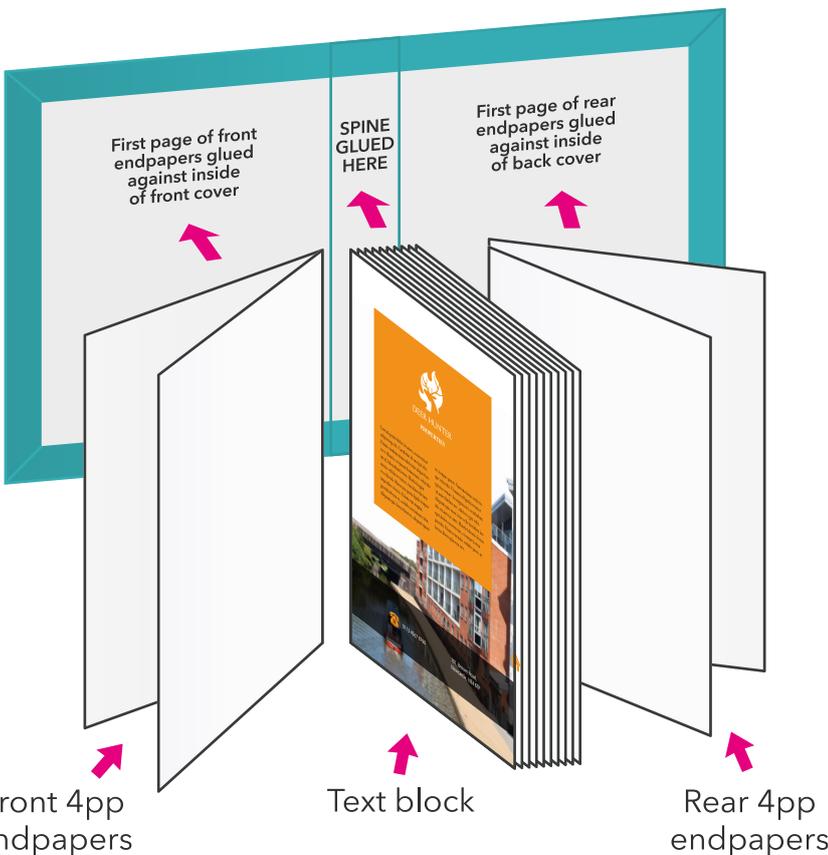

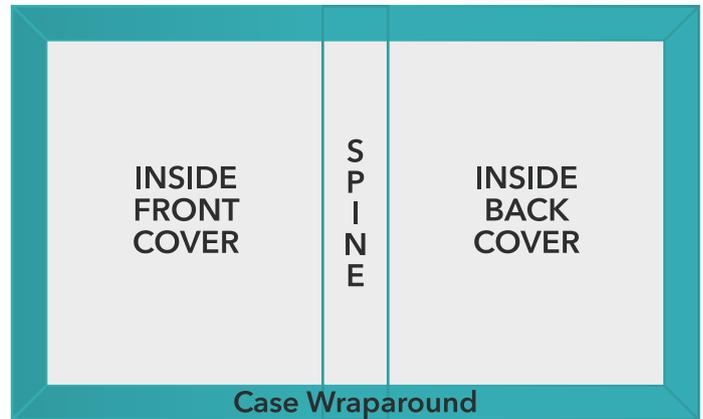

### Case & Spine

Casebound covers are 10mm larger in size than the text pages, requiring a 24mm printed wraparound, which is folded onto the inside of the cover.

The width of the spine depends on number of pages included in the book. We produce Casebound Books with spines up to 33mm. To find the correct spine measurement, please use our online spine calculator or check with us.

It is advised to keep text 5mm away from the outer edges of the page and 10mm away from the spine.

Printed paper over board cased cover

### Endpapers

We produce our Casebound books with 4pp endpapers. The first page is glued against the inside front cover for the front endpapers and the last page is glued to the back cover for the rear endpapers.

You do not need to add endpaper pages to your artwork, we will automatically do this for you.

Our endpapers are always produced unprinted, on uncoated stock. If you require printed or 2pp endpapers please place a bespoke order.

**FOR BEST RESULTS ENSURE ALL ARTWORK ELEMENTS ARE WITHIN THE SAFE AREAS SHOWN WITHIN OUR TEMPLATES.**
