

# CASBOUND BOOK TIPS

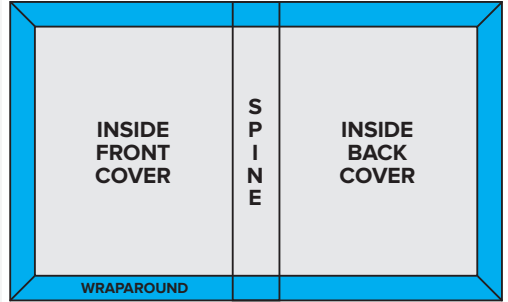

## PREPARING YOUR DESIGN FOR CASING

### CASE & SPINE

Case covers are 10mm larger than the text pages and require a 24mm printed wraparound, which is folded onto the inside of the cover. (See templates)

We produce Casebound Books with spines up to 33mm. To find the correct spine measurement, please check with us.

It is advised to keep text 3mm away from the edge of the spine.

For best results ensure all artwork elements are within the safe areas.

### PRINTED PAPER OVER BOARD CASSED COVER

### ENDPAPERS

We produce our Casebound books with 2pp endpapers. The 1st page is glued against the inside front and back covers. (See image)

You do not need to insert the endpapers into your artwork, We will automatically do this for you. If you require additional endpapers please be sure to incorporate them into your order/artwork or speak to us to let us know.

*Our 2pp endpapers are always produced on uncoated stock.*
